</table>

As detailed in Table 10-A above, with the exception of Roane County, all solid waste regions of the East Tennessee Development District (ETDD) made the 25% waste reduction goal from the real-time comparison methodology. Roane County did not make the 25% goal due to inaccurate reporting specifically caused by companies refusing to provide recycling/diversion data for inclusion in the annual report. Roane County plans to seek the assistance of TDEC staff and ETDD solid waste staff in collecting recycling/diversion data for their 2020 report and in developing relationships with local industry to ensure consistent reporting of data in the future. The other fifteen counties of ETDD met their goals primarily through accurate reporting and diligent effort at collecting private recycling/diversion data. The ETDD region is home to many industries who take pride in sharing their successes in recycling and diverting material from the landfill.
